Work Experience

Mercedes-Benz Research and Development India as Graduate Engineer Trainee - Data Analytics Aug 2018 to Aug 2019

Job description: Develop algorithms for extracting intelligent insights using the concepts of data analytics and machine learning from the given data set as a part of a dynamic reporting platform. We marketed and implemented this solution among different teams that were working in the organisation that were using traditional methods for reporting. My responsibilities in the project were as follows

- 1. Use the concepts of data science and machine learning to draw useful information from the raw data provided and send the patterns to the front end of the web application in JSON format
- 2. Use the techniques of text mining to identify the core issue from a complaint that is filed to advice the steps that need to be taken by user at the front end.

Technologies used: Python-programming, R-programming, RDBMS, JSON formatting
