- ?To carryout regression tests after anomalies correction.
- ? TestIntegrationPerformedinRTRTTool.
- ? ProgramminginADALanguage.

Master's Degree Thesis Title is Software Integration Test for Railway Control Systems.

Development of GATEWAYTB HTTP SERVER PROTOCOL for 2nd GENERATION RADIO BLOCK CENTRE (RBC2G) ON C#.

Client:-RFI Company (Protocol and related document is Ansaldo STS Company)

- 1. ThenetworkprotocolusedbytheGatewayTBapplication(fromversion2.5.0.0)toexchange information with external applications about the simulated trains and the state of the line.
- 2. The HTTP protocol is a request/response protocol. Once the TCP/IP connection is established, a client application sends a request to the server application (GatewayTB) a then waits for the response. In the request message, the client, accordingly to the HTTP protocol, sends the HTTP version it can manage; the behavior of the server depends on such version: if the client requested HTTP 1.0 then the server, as soon as it has sent the response, closes the connection; if the client requested HTTP 1.1, the server, after sending the response, waits for a new request on the same connection until a configured timeout (since the last request) elapses or the client itself closes the connection.
- 3. ThebodyoftheresponsemessagesentbyGatewayTBiscomposedbytwoparts:thefirstpartis in HTML format allowing any internet browser to show the data; the second part is in XML format and can be easily parsed by a personalized client application. C# libraries to build parser.
- 4. ThisissimulationenvironmentandclientandServerapplicationisdevelopedbyC#Programming language in class library by using Visual Studio 2017.

Gleo Technology Pvt. Ltd., as SQL Developer
