Summary

An enthusiastic & high energy driven professional with over 1 years of experience targeting challenging opportunities in Research and Analytics
Possess intellectual curiosity and skills to mine hidden value from sets of structured, semi-structured and unstructured data
Hands-on experience in Linear Regression Analysis, Cluster Analysis and Factor Analysis to conduct research in various sectors; familiar with Base SAS including PROC SQL
Resourceful in conducting research activities involving understanding and sourcing information and processing of data and applying the same using technical knowledge ensuring timeliness and quality
Possess good understanding in collating and interpreting data for determining outcomes for various companies / organizations
Keen analyst with excellence in gathering and understanding requirements of clients & other multiple stakeholders followed by translation into functional specifications as well as provisioning of suitable solutions

Work Experience

Xceedance Consulting India Pvt. Ltd., as Risk Analyst
Aug 2018 to Aug 2019

Key Result Areas
Worked on multiple lines of business (LOB) to analyze the data and estimate the losses, across Terrorism and Energy domain; prepared documents and reports of the losses for further decision making and delivered the final reports to the client
Functioned for Global Property; worked with property data of US to analyze and estimate the Losses
Used R programming and MS Excel for data reviewing and data manipulation; utilized RISKLINK and Applied Insurance Research (AIR) tools for loss estimation
Interacted with Underwriters regarding the exposure information like insured values, financial limits & retention of different

lines of business on a regular basis
Identified, collected, processed and analyzed the data, specimens, and/or samples according to established protocol, procedures & standards
Planned and organized day-to-day research activities and resolved procedural problems as appropriate to the timely completion of research objectives
Implemented & standardized KPI metrics through comprehensive reviewing & redesigning and relating directly to product features, resulted in better insights, consistent metrics, and reduced service cost
Analyzed and processed complex data sets using advanced querying, and analytics tools
Translated business requirements into system requirements through analysis of the existing production system including different system interfaces with other applications
Estimated the losses that could be sustained due to a catastrophic event such as Hurricane, Earthquake, Flood and Windstorm
Engaged in data capture and reporting on a daily basis
